

AQUAPOTS™

by PROVEN WINNERS®

 **EVERETT'S**
GARDENS
Where Plant Lovers Go!

How does it Work?

- Heavy duty components assemble and disassemble easily with no tools required. The self-watering insert can easily be taken apart, cleaned, and reused year after year.
- The completely sealed pot eliminates unsightly staining on the deck or lanai surface.

- While you're saving time and labor, the plants grown in AquaPots are bursting with vigor due to their consistent access to nutrient-infused water.
- AquaPots use 75% less water than drip irrigation systems without the hassle of drip tubing. Simply top off the tank once per week, or even less frequently for extra-large AquaPots.
- The risk of overwatering is eliminated by the overflow valve. Even in heavy rain, the valve maintains the proper water level in the pot.
- Nutrient-infused water continually feeds the plants without any runoff or waste. Simply add two scoops of Proven Winners Premium Continuous Release Plant Food to the fill tube at the time of planting, and it will continue to feed for up to six months.
- Because the soil and water reservoirs remain completely separate, AquaPots won't become clogged, and the plants' roots won't suffocate from too much moisture.

See the Key Benefits of AquaPots®:

- The convenience of a self-watering pot with the beauty of high-quality, glazed ceramics.
- An overflow valve ensures plants cannot be overwatered.
- A cleaner look that can be enjoyed anywhere instead of needing to stay where plumbing is located.
- Elimination of fertilizer leaching and runoff.
- No more water ring stains on the deck or porch.
- Smaller AquaPots last at least a week between waterings; larger pots last up to one month.
- One quarter of the water is used with AquaPots vs. similar sized pots on drip irrigation.
- Beautifully grown plants have continuous access to fertilizer-infused water.
- Frost- and freeze-resistant ceramic. Simply empty the pot and flip it over for winter (in northern gardens).

”

We love our AquaPots! They are stunning and always look perfect. No muss or fuss, and believe me, I have tried many pots in the past which always gave us problems with overwatering or underwatering. We like the varied heights, which add interest around our pool on the screened lanai.

Chrissy and Don P. – Marco Island, FL

AquaPots® Collection

SMOOTH VOLCANIC ON FALLING BROWN

16 AquaPots – SWVOB014VOLFBR

A – Round
